## **DETAILED ACTION**

### ***Acknowledgment***

1. This Office Action is responsive to the Amendment filed on 9/10/2007.

### ***Claim Objections***

2. Claim 1 is objected to because of the following informalities:

The recitation of "n" recited at last line of the claim is suggested to change to –  
on --.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feng et al (US 7,099,380) in view of Provencé (US 4,885,757).

As shown in figure 8, Feng teaches an OFDM receiver having antenna selection (310) based on low error rate. See also column 5, lines 57-65 and column 6, line 62 to column 7, line 35. Feng fails to teach using the neural network to model the frequency response of the channel. However, Provene, as shown in figure 8, teaches using neural network (68) to model the frequency response of the channel. See also abstract and column 12, line 51 to column 17, line 16. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Feng by incorporating the neural network as taught by Provene so that the channel characteristics can be correctly modeled and thus to provide a better frequency response estimation of the channel.

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
